# DIRT DOCTORS

Our Dirt Doctors program is designed to teach children how individual actions affect our waterways. The presentation explains the connections between vegetation, soil erosion and water quality in a fun-filled, interactive environment complete with squirt guns and a fair amount of dirt and mud.

## **PARTICIPANTS WILL LEARN**

- Watershed awareness
- Soil erosion education
- Importance of fresh water
- How our actions affect water quality
- Simple steps for preventing water pollution
- What stormwater runoff and nonpoint source pollution are

# DIRT DOCTORS

The Dirt Doctors are a favorite at water festivals and are available to attend special events. To find out more about scheduling a presentation, email us at [envreq@oakgov.com](mailto:envreq@oakgov.com). An online version of this program is also available in Kahoot! Scan the QR code to watch the video and then take the quiz to test what you've learned.
