

WATER RESOURCES COMMISSIONER

*Jim Nash*

# DRAIN DETECTIVES

This program teaches middle and high school students about watersheds and ways to identify and trace sources of pollution. The program provides a hands-on, interactive experience using technical equipment and experiments to demonstrate how water moves across a watershed and how pollutants can be detected.

# DRAIN DETECTIVES

We are available for field trips and to attend special events. To schedule a presentation and learn more, email [envreq@oakgov.com](mailto:envreq@oakgov.com).

## LEARN ABOUT:

- Stormwater collection systems
- Watersheds
- Types of pollution that impact water
- Tools used for water investigation
