

E-CIGARETTE DISPOSAL—BEST PRACTICES

E-cigarettes can be dangerous when stored, used, or thrown away incorrectly. Safely dispose of e-cigarettes, their batteries, cartridges, and bottles that contain e-liquids by following these best practices.

1

TURN OFF

Turn off the device and remove the rechargeable batteries. If the device is not yours, have the owner of the device do this.

2

STORE

Store all items, including rechargeable batteries, in a container in a cool, temperature-controlled place.

3

LABEL

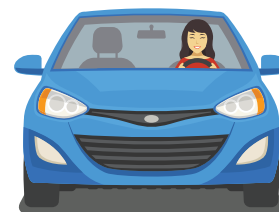

Tightly fasten and clearly label the container "hazardous waste."

4

DELIVER

Deliver the sealed container to your local hazardous waste center.
